Dear Sir

It is with great enthusiasm that I apply for the position of software engineering. After speaking to colleagues, I believe that the staff and facilities are excellent. As you will see in my results and experiences, I am committed to giving my best to any situation, have a holistic approach and would value the opportunity of working in an organization like software's development, app development, web development, database and many more.

I can bring to the role strong team skills and effective communication skills. These have been honed through interactions and presentations to a range of audiences. My academic achievements and voluntary involvement in improving the standards of software engineering in developing countries are indicative of my commitment to all aspects of software's field.

My experience at Pak event sand software solution Rawalpindi as a software engineer has given me the opportunity to develop my skills including software development, web development, database and follow up of company plan.

In support of my application I have attached a resume providing a summary of my relevant experience. It would be my absolute pleasure to work at software's field and I believe I have the potential to be a valuable member of the team. I look forward to discussing my application further at interview.

Sincerely

Abu Bakar Siddiq  
Software Engineer
