PERSONAL PROFILE

I am proactive and qualified professional in Quantity Surveying, Contracts and Commercial Management responsible for project strategy and delivery across multidiscipline project functions. I am currently responsible for the delivery of a US multi-million dollar construction project in the Middle East. I have substantial experience in procurement, contracts, cost control, etc. implemented under various procurement and contractual arrangements including the FIDIC contract.

My experience includes infrastructure, hotels, leisure, commercial, residential, refurbishment and retail developments from inception through to completion. I am a strategic and logical thinker, a team player demonstrating drive, leadership, motivation and a committed response to any brief or challenge no matter how complex.

PROFESSIONAL RESPONSIBILITIES & SKILLS

- Responsible for the management of contractual and commercial matters relating to projects, including dispute resolution, claims management, contract administration.
- Support management in the resolution of contractual/commercial issues and disputes.
- Estimating building costs, managing building contracts and monitoring construction progress.
- Control of cost on construction projects that covers a range of activities which include cost analysis, valuation and estimating.
- Work closely and regularly with architects, engineers, subcontractors and project owners in the general implementation of the project.
- Examine, study architectural and structural engineering drawings and specification.
- Organizing the allocation of work to smaller, more specified construction companies (known as subcontractors) according to which offer the best value, or helping to identify the most suitable subcontractors, based on considerations of cost, quality and service.
- Administer the tendering process for contractors, subcontractors, suppliers and preparing request for proposal (RFPs) for the consultants.
- Assess and recommend payment to architects, consultants, contractors, subcontractors and suppliers.
- Manage costs to ensure that the budget is not exceeding, including negotiating with employer's cost in-charge.
- Monitor any changes in the design or cost throughout the construction phase.
- Recalculate costs if the design or materials change to assess the effects on cost.
- Negotiating changes in price with the employer's quantity surveyor and agreeing payments process.
- Prepare a statement of final account recording the actual costs of the project and valuing completed work and arranging payments.
- Good knowledge on international standards of Form of Contracts like FIDIC, NEC/ECC and JCT.
- Good knowledge on International measurement principles like POMI, SMM, NRM and CESMM.
