## About Me

My fifteen years of experience in a capacity of IT Manager is motivated by challenges, confidence, and determination. Good team player and able to use own initiative to achieve clearly defined objectives.

## ACHIEVEMENTS & SKILLS

## Professional Experience

Aug 01, 2007 ~ Till Present

**AL-GHURAIR Group, TransMak Dewatering Services L.L.C, Dubai, U.A.E**

IT Manager

Working as team leader to implement Microsoft Dynamics NAV. Meet with department representatives to review business strategies, define business needs, translate needs into technical specifications, determine technology solutions, and develop corresponding project plans.

Maintain IT equipment's CCTV, PABX, Server, Computers, Printers, etc.

### Portfolio & E-Commerce Website:

Developed personal portfolio <http://www.blessedradiant.com> and e-commerce website using Angular 9, JavaScript, Node JS, Bootstrap, CSS, jQuery, Ajax, MY SQL, Java Spring Boot, and RESTful API.

### VB.Net / MS SQL Server Project:

#### ERP Project Challenges

Design, analyze, program, test, debug, documentation, and migration of company's existing data in ERP System. Identifying problems and opportunities for improvement of IT solution.

Designed parameterized, extended CLR store procedures & functions using SQL server T-SQL programming. Retrieve appropriate records from database. Create classes by implementing Inheritance, Polymorphism, Data Abstraction, and Encapsulation to insure maximum code re-use.

### HR & Payroll System:

**Employee Leave Management:** Monitoring employee leave, air ticket, last movement type, total

emergency leaves, sick leave per year, total paid leaves, leave Status (in or outside a country), departure date, air fare encashment, air fare availed, and absentees.

### **Employee Final Settlement, Users Profile, & Settings.**

**Tracking Employee Liabilities and Guarantors:** Track employee liabilities, and register guarantor incase employee want to go for leave. The system can track primary and secondary guarantors.

#### **Fleet Management System:**

1. Print on hire confirmation note, and off hire confirmation note.
2. Monthly invoices based on fleet movements i.e on hire, off hire, break down, and unit replacement.
3. Track drivers / operators associated with fleet.

Aug 01, 2006 ~ July 30, 2007

**Zenith Computer, Sharjah, U.A.E**

Software Engineer

#### **MS Access Project:**

**Inventory Control System:** Insert, update, and delete new parts. Generate local purchase order, goods received, and goods issued voucher by applying FIFO, moving average, or weighted average costing methods.

March 15, 2005 ~ Jul 31, 2006

**Golden Key International, Pakistan**

IT Manager

#### **Visual C++ Project:**

**Image Processing and Steganography:** Concept is embedding / extracting messages in image. The embedding and retrieving of messages are only possible by the combination of public and private key stored inside the image.
