- Writing solutions for different projects with team
- Writing Optimized web services and backend handling for mobile application
- Design and develop full stack enterprise applications, workflow , charts etc
- Help team members in development and technical progression
- Writing multiple code and script and ensuring cross browser compliance

#### **Projects**

- RHB Bank Help Desk
- Sunway Charter of Account

- DispatchGo
- Ipfuntastic
- PAMS

**Application Engineer– LMK Resources (As Outsource candidate for Landmark Halliburton)**  
*(May 2010 – April 2015)*

**Duties**

- Design high level CRUD Accessors to handle huge amount of Data.
- Closely work with Product Architect to fulfil customer Requirements.
- Data Access Layer development and Junit tests development
- Write and Optimize SQL Queries.
- Fix Bugs, add enhancements and optimization.
- Enhancements in Perl and Shell scripts to generate & Execute SQL scripts.
- Write Triggers, procedures and functions for the database tables.
- Build Patch for customers and include all related bug fixes and enhancements.

**Projects**

- CDS – Corporate Data Store
- MDS – Master Data Store
- Openworks
- RDM – Reference Data Manager

**Application Executive – Teralight LTD**  
*(April 2009 – May 2010)*

**Duties**

- Develop Call data capturing system on SS7 probes
- Develop fake call generation system to detect and capture grey routes data
- Generate reports using crystal reports to represent the Grey routes

**Projects**

- Prevail (Guardian)
- Teranet Test

## Education

---

International Islamic University Islamabad

(2005 – 2010)

BS in Computer Science

## Extra-Curricular activities

---

- Virus research and diagnose; I am developing a freeware antivirus program on my extra time with total different concept and idea.
- Wrote an architecture called Bus architecture to provide the application variables at one place.
- Designing many prototypes model based on my future vision; that maybe used in near future.
- Wrote a Search Algorithm with  $O(N)$  complexity called VerseReverse.
- Wrote and design software to control home electricity.
